

GETTING BACK TO BUSINESS

We're delighted to be welcoming back more and more business travellers, as customers start reconnecting with clients, partners and colleagues in-person where possible.

We understand that your needs have changed and we've been working hard to adapt our corporate offer. Please take a moment to read about some of the recent and upcoming changes.

NEW CORPORATE OFFER

Good news – we've just launched our new corporate offer for travel within Standard Premier and Business Premier (first class), where you can relax in an environment designed specifically for business travellers.

With our new corporate offer, it's now easier to get a discount as we've lowered the qualifying spend threshold. And we've started taking into account your total expenditure in all of our travel classes.

In Business Premier, you'll enjoy unique benefits including access to our lounges, the use of fast-track ticket gates, fully flexible tickets and a three-course meal on board in our quiet, comfortable coaches.

BSP (billing and settlement plan)

By the end of the year, we're aiming to be BSP-compatible with bookings made via GDS-Air through points of sale in Belgium and the Netherlands.

API (new interface for bookings)

We will be launching in early 2022 a new API, where clients and their TMCs can directly access our inventory system and can easily book tickets and manage their existing bookings.

INTRODUCTION OF GDS FEE

From 01 October, a fee will be added to all GDS bookings, which will cover a cost that Eurostar previously absorbed. This is a charge that airlines introduced some time ago in response to the GDS costs.

INCREASED TIMETABLE

Due to growing demand, we've increased our number of trains, with up to eight daily return services. There are now five on the London to Paris route and three between London and Brussels, one of which is extended to Rotterdam and Amsterdam.

THE GREENER WAY TO GO

As the world gets moving again, many of us are looking for more sustainable solutions. At Eurostar, we're proud to be the green gateway to Europe. Your carbon footprint from one flight can be the same as making 13 Eurostar journeys.* That's the equivalent of travelling with us every day for almost two weeks.

Our station and onboard staff are ready to welcome back our business travellers. From the moment you pass the ticket gates until you arrive in your destination, we'll be on hand to give you that unique Eurostar experience. We look forward to seeing you soon.

*Based on 2019 CO2e emissions. More info at eurostar.com
